

Researcher Workshops

Bring a free, customizable, virtual STEM researcher workshop to your institution for undergraduates, graduates, postdocs, and faculty

Elsevier offers an ever-expanding curriculum, with learning modules for anyone on campus, including:

- What are journals and why are they important to STEM?
- Identifying scientific literature
- Tips to writing a great paper, section by section
- Finding the right journal and avoiding the wrong one
- Understanding the peer review process and what editors look for
- Publishing ethics and responsible sharing
- Publishing your data
- Promoting your work
- Getting involved as an editor or reviewer
